Thank You

2020 was our agency's 65th Anniversary, and it was certainly a year to remember! In 2020, Cancer Services experienced some of the greatest needs and increases in client requests in the history of the agency, and we were able to respond to those needs with your help!! We met double digit increases in clients, services, and financial needs. While we had to stop gathering in person, we began digital programming and outreach and saw people engaging together in these changed environments. Dedicated to meeting the critical needs of cancer survivors, we never closed our offices, and are so thankful for the results we were able to achieve on behalf of clients. Thank you for your support.

Looking Forward

Moving into 2021, we know we are still in the midst of difficult circumstances and many unknowns, but so are our patients and families, and we will continue to all work together to "Enhance Health, Life & Survivorship". We want to share very special thanks to all of you who made contributions and donations, supported our fundraisers and raised funds on our behalf. These dollars were and continue to be critical and we are so honored you are joining us in achieving our mission, demonstrating such passion and commitment for Cancer Services and our clients.
